# A portfolio

By Bryce

# Design & Decisions

The idea:
- Space & planets, I'm a fan.

The Mood:
- Similar colours using coolors.co
- Mini planets
- Monty python animations

The wire:
- A planet with little gems on it that would rotate when scrolling.
- Do it without distracting from the content.
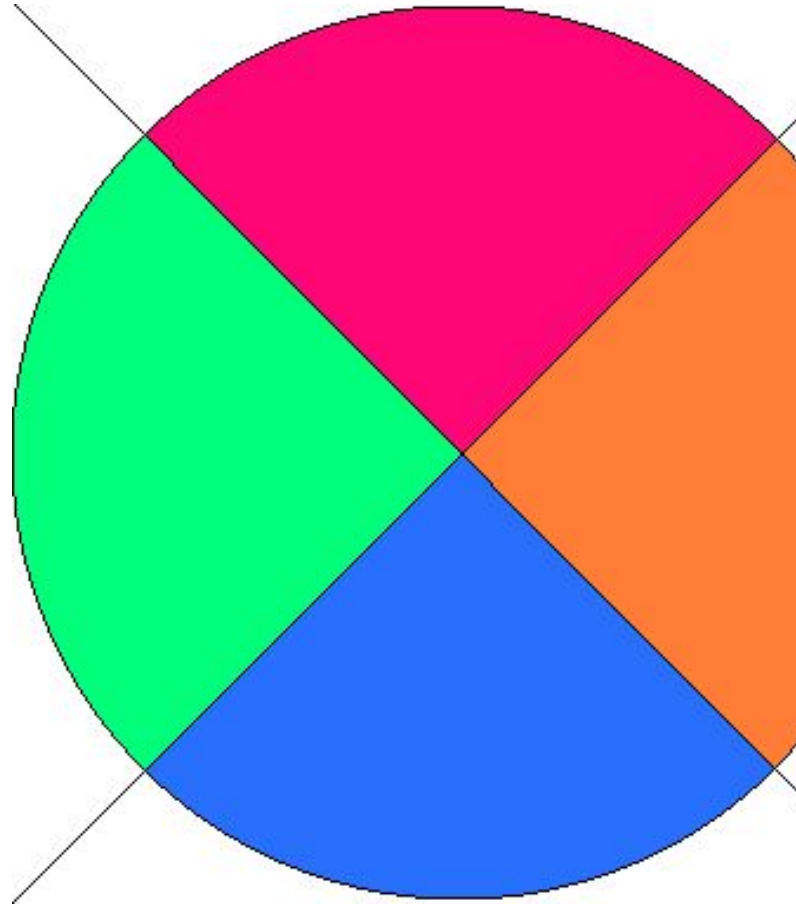

Where did I begin?

Mobile first

- Made things super easy, Desktop was a breeze.
- Flexbox
- Designing the visual and how it helped

- Spinning with JS.

The ethical ramifications of selling oneself...

I'm fine with it.

Challenges:
- I don't like my designs, second guessing myself.

- Sticking to decisions.

- Not starting over.

Favourite bits

- Start to finish - Feels good.

- Everything was done by me.

Could I do it better?

- Yes
